

SHREYA MOOKHERJEE

7 Lake Baldwin Dr. • Pennington, NJ 08534 • mookherjee.s@northeastern.edu • (609)480-4894

EDUCATION

NORTHEASTERN UNIVERSITY, Boston, MA

September 2025 - Present

Bachelor of Science in Data Science and Biochemistry, GPA: 3.9/4.0

Honors: Mary E. Beyerle National Merit Scholarship, Northeastern Merit Scholarship, Dean's List, ASMB

Coursework: Intermediate & Advanced Programming in Data Science, Organic Chemistry, Genetics, General Chemistry, Discrete Structures, Biological Inquiries

Extracurricular Involvement: Generate, NURover, NU Women In Tech, STEMout

THE PENNINGTON SCHOOL, Pennington, NJ

September 2021 - June 2025

GPA: 4.15/4.33, SAT: 1570

Honors: Cum Laude Society, American Computer Science League Finalist, National Honors Societies (Art, Theater, and French)

Relevant Coursework: AP Biology, AP Computer Science A, AP Calculus AB, AP Statistics

Extracurricular Involvement: American Computer Science League Team, Women In STEM, Literary Magazine

ACADEMIC/PERSONAL PROJECTS

Song Popularity Predictor | Python, DS2500

- Developed and compared linear regression and KNN models to predict song popularity from audio features, achieving up to 79% accuracy using a 114k-song dataset with a team of 4
- Authored 8-page technical report analyzing model performance, feature importance, and real-world applications for music artists and producers
- Presented findings and incorporated peer feedback to optimize model accuracy

Healthy Huskies | Python, Northeastern ACM Hackathon Winner (Finance/Business Track)

- Developed a full-stack website with a team of three to help students optimize dining plan spending by tracking meal swipes and dining dollars through a budgeting algorithm
- Implemented responsive front-end interface and data visualization for semester-long budget tracking

SKILLS

Technical: Java, Python, React, Typescript, GitHub, MacOS, Adobe Suite, Google Suite, Microsoft Suite

Soft: Creative, problem solving, communication, organization, leadership, hard-working, empathetic

ADDITIONAL EXPERIENCE

GENERATE PRODUCT STUDIO

Boston, MA

Data Scientist

January 2026 – Present

- Selected from a pool of ~100 applicants to architect data transformations, visualizations, and authorization systems alongside a team of 9 for a local startup
- Extracted ground contact time, flight time, step count, and splits from in-shoe pressure sensor data for sprinters and hurdlers, leveraging these metrics to design predictive models for estimating distance covered and detecting anomalies in running form
- Designed dashboards replacing manual video analysis with automated, predictive insights to help athletes optimize performance

NORTHEASTERN ROVER TEAM

Boston, MA

Life Detection Researcher

September 2025 – Present

- Executed laboratory assays including protein detection and DNA extraction with a team of 4 to establish calibration curves and standards for a Mars Rover competing in the University Rover Competition
- Developed biological benchmarks serving as reference points to evaluate soil samples and determine the presence of life indicators
